01 Summary

After working in client contract development and as a freelancer, I became the development lead and lead engineer for an app with tens of thousands of users, overseeing its engineering department. As a full-stack engineer I work across backend, infrastructure, frontend and mobile, and have covered the whole lifecycle — requirements, design, implementation, testing and operations — both on my own and as part of a team. I have also worked on engineer hiring and training, development efficiency and management, and on many Web3 projects. I can conduct business in English.

I founded and lead **Euthopia** (euthopia.io), an AI app builder with 80+ apps and sites built on it. Euthopia runs on GPT, Claude, Gemini and Qwen; I also work with DeepSeek, Kimi and GLM, and run models locally with Ollama, llama.cpp, vLLM and LM Studio.

02 Highlights

- Founder and lead engineer of an AI platform: started February 2026, officially released April 2026, 80+ apps and sites built on it, a choice of AI models for each job
- End-to-end delivery, from client hearings to requirements, technology selection and development
- Full-stack development with Flutter, Swift, Kotlin, TypeScript, Go, AWS and more
- Projects across many industries: e-commerce, advertising, Web3, automotive, finance and AI
- Led multiple 0→1 launches, owning full-stack development and technology selection

03 Experience

2026.02 — PRESENT

Euthopia — AI app builder (euthopia.io)

FOUNDER · LEAD ENGINEER

Founded Euthopia and lead its engineering: an AI platform that turns a conversation into a live app or landing page — it designs, builds, hosts and publishes it — and lets each job run on the model that suits it. Started in February 2026 and officially released that April; 80+ apps and sites built on it.

Models: GPT · Claude · Gemini · Qwen

2026.06 — 2026.08

AI Core System Development

FULL-STACK ENGINEER

Built the core system of an AI product across backend and frontend. Contributed to quality and development standards through code review.

Nuxt.js · Nest.js · TypeScript · PostgreSQL · AWS

2025.12 — 2026.04

AI Consulting & Development Support

AI CONSULTANT

Designed and built an LLM-powered coding-assist system. Trained in-house engineers in using AI, contributing to higher productivity across the team.

TypeScript · Python · Next.js · Claude API · Docker

2025.09 — 2026.04

AI Fitness App (0→1)

PM • LEAD

Led the 0→1 phase as PM. Owned the AI chat and voice systems from technology selection to implementation, and designed the whole frontend architecture and the review process.

Flutter • Dart • React • Firebase • OpenAI API

2025.09 — 2026.03

Android TV & Web Feature Development

LEAD

Led feature development for Android TV and new web features, from requirements and design through a Go backend and React frontend.

Go • Echo • React • TypeScript

2025.05 — 2026.04

Banking App Development

PM • UI DESIGNER

Developed a banking app in a business-English environment. Implemented the UI and API integrations, and agreed technical specifications with each team through English chats and meetings.

Flutter • Dart • Swift • MySQL

2024.11 — 2025.04

Official App for a Major Beauty Company

PM

Implemented the UI in Flutter and the GraphQL integration. Built a CI/CD pipeline with CircleCI that automated releases, and improved the API integration, contributing to better performance.

Flutter • GraphQL • Firebase • CircleCI

2023.08 — 2024.09

Social Networking App

PM • UI DESIGNER

Developed it from the specification through UI and API integration, and helped improve the team's development workflow.

Flutter • React • Firebase • AWS

2023.02 — 2023.05

Web3 App for the G7 in Hokkaido

DEVELOPMENT LEAD

Built a Web3 app for the G7 in Hokkaido from zero in about four months, covering data design, designer selection and management, development and release.

Flutter • Solidity • Vue.js • Firebase

2022.05 — 2023.04

Keyboard App, Advertising Industry

LEAD

Maintenance, operations and new features; turned improvement proposals into product changes quickly and built tools to streamline operations. User retention rose by about 10%. Also handled hiring, training and DevOps.

Swift • Kotlin • Go • AWS • Flutter

2021.11 – 2022.10	New Service App, Automotive Industry LEAD Built the foundation for mobile development — environment setup, documentation and technology selection — then worked on web, backend and infrastructure development. Swift · Kotlin · Flutter · Next.js · AWS
2021.06 – 2022.08	Education E-commerce App LEAD · MEMBER Developed a new education e-commerce app from client hearings and design through implementation, including a Stripe payment system built on webhooks. Also trained programmers. Flutter · FastAPI · Python · Stripe · AWS

04 Skills

Languages	TypeScript · Go · Python · Dart · Swift · Kotlin · JavaScript · HTML/CSS · SQL · Solidity
Frameworks	React · Next.js · Nuxt.js · Vue.js · Nest.js · Gin · Echo · FastAPI · Node.js
Mobile	Flutter · React Native · Android TV
AI & LLMs	OpenAI API · Claude API · DeepSeek · Qwen · Kimi · GLM — local models: Ollama · llama.cpp · vLLM · LM Studio
Cloud & data	AWS · Firebase · Firestore · MySQL · PostgreSQL · DynamoDB · GraphQL
Tools	Docker · Git · GitHub Actions · CircleCI · Figma
OS	macOS · Linux · iOS · Android · Windows
Process	Requirements, basic design, detailed design, implementation, testing, maintenance and operations, management — each at level A on my skill sheet's scale (works independently, solves problems, mentors others)

05 Education & languages

EDUCATION	LANGUAGES	WORK STYLE
Shizuoka University of Art and Culture — Faculty of Cultural Policy and Management, Department of Intercultural Studies	Japanese · English (business level)	Freelance contract, full remote from Tokyo, from a single feature to a full product build · available from October 2026 · relocation open to discuss

As of September 2026 · Japanese skill sheet: mazemaze.github.io/portfolio/assets/skill-sheet.pdf
